10. Scenario: You are working on a data visualization project and need to create basic plots using

Matplotlib. You have a dataset containing the monthly sales data for a company, including the

month and corresponding sales values. Your task is to develop a Python program that generates

line plots and bar plots to visualize the sales data.

Question:

1. How would you develop a Python program to create a line plot of the monthly

sales data?

2. How would you develop a Python program to create a bar plot of the monthly data sales?

CODE:

```
import matplotlib.pyplot as plt

months = ['Jan', 'Feb', 'Mar', 'Apr', 'May']

sales = [10000, 15000, 12000, 18000, 20000]

# 1. Line Plot

plt.plot(months, sales, marker='o')

plt.title("Monthly Sales - Line Plot")

plt.xlabel("Months")

plt.ylabel("Sales")

plt.show()

# 2. Bar Plot

plt.bar(months, sales)

plt.title("Monthly Sales - Bar Plot")

plt.xlabel("Months")

plt.ylabel("Sales")

plt.show()
```

INPUT:

Months: Jan, Feb, Mar, Apr, May

Sales: 10000, 15000, 12000, 18000, 20000

OUTPUT:
